

TIPS TRICKS^{AND} HOW TO...

For Students

Tune-up Your Browser

Note: It is important to check and tune-up your browser. WebCT will not run properly if you are using an unsupported browser.

Current browsers include:

- Internet Explorer 5.0, 5.5, 6.0 (best)
- Netscape 6.2 (not a good choice, some have problems with it), 7.0, 7.1
- AOL 7.0, 8.0
- Mozilla 1.5

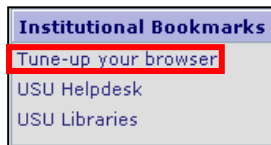

To check your browser, complete the following steps.

1. Log in to WebCT (If you are on an unsupported browser, the WebCT Campus Edition will automatically tell you if you are on using unsupported browser after you login)
2. You can also validate and tune up your browser by going to My WebCT and click on "Check Browser" on the top navigation bar

3. This link will take you to a new page that will tell you if your browser is valid to use with WebCT
4. If you are not using an accepted browser click the "Browser Tune-Up" link on My WebCT page. This will redirect you to the WebCT website for further

instructions
